

St. Luke's Medical Center Setting Benchmarks in Healthcare Excellence

St. Luke's Medical Center-Quezon City was the first hospital in the Philippines to earn accreditation from the prestigious **Joint Commission International (JCI)** in 2003, positioning it as a pioneer in healthcare excellence in the region. Additionally, it became the first Philippine hospital to achieve JCI accreditation as an Academic Medical Center Hospital in 2016, reaffirming its dedication to medical education and research. St. Luke's Medical Center-Global City achieved JCI accreditation in 2012, within just two years of opening, highlighting its commitment to high-quality, patient-centered care.

Both St. Luke's locations are also JCI-accredited for their Clinical Care Program Certification (CCPC) for the Primary Stroke Program, demonstrating their ongoing commitment to outstanding healthcare services and patient outcomes.

CHOOSE
ST. LUKE'S MEDICAL CENTER
for a better healthcare experience

Embark on a Healing Journey in One of the World's Finest Destinations

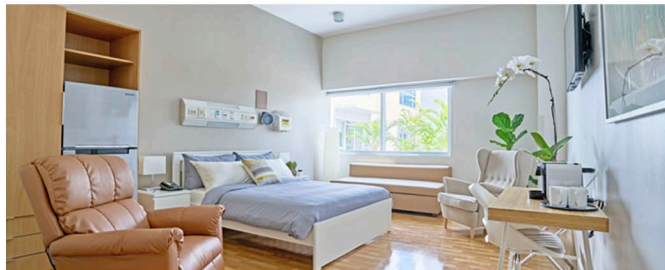

With 7,640 stunning islands, the Philippines is a popular destination for leisure and medical travel. Positioned as a medical hub across three regions, it offers affordable healthcare, combining modern technology with cultural richness. The Philippines stands out for its value-for-money proposition, offering medical treatment rates lower than those of the United States of America, Malaysia, Thailand, Singapore, and South Korea.

Renowned for the warmth and cultural sensitivity of Filipino health professionals, the country provides expert medical care that prioritizes patients' holistic well-being. Internationally accredited hospitals, state-of-the-art facilities, and a high level of English proficiency ensure a seamless experience for medical tourists, focusing on communication, quality of care, and patient safety.

The healing experience in the Philippines extends beyond medical treatment, emphasizing the importance of spiritual and emotional well-being. Patients can rejuvenate amidst warm hospitality, enjoying beach retreats, island-hopping, cultural encounters, and wellness zones.

Your journey to better health starts here.

St. Luke's Medical Center is your gateway to world-class healthcare in the heart of the Philippines. At St. Luke's, we understand the unique needs of international patients, and our dedicated team at the International Patients' Lounge (IPL) is committed to providing seamless, personalized, and compassionate care throughout your medical journey.

COMFORT & CONVENIENCE

At St. Luke's, the premier medical institution in a top tropical destination, a range of suites, rooms, and eco-friendly amenities are tailored to international patients, featuring locally sourced comforts for a distinctive Filipino experience during recovery. Our International Patients' Lounge is meticulously crafted to offer convenience and solace, providing pre-arrival support, WiFi, and complimentary snacks while fostering a healing ambiance. Dedicated teams oversee every aspect of international patients' stay, from appointment scheduling and travel coordination to continuity care and document retrieval, ensuring seamless care from pre-departure through treatment to post-care, epitomizing our commitment to comfort and convenience.

EASE OF COMMUNICATION

Communication between patients and health providers is the cornerstone of healthcare delivery. As the Philippines stands as the world's third-largest English-speaking nation, seamless communication is readily accessible across the archipelago. From the moment a medical tourist sets foot in the country until their departure, there are no language barriers to articulating health requirements and discussing important information.

Here's what you can expect from our comprehensive services:

Pre-Arrival Arrangement

- ✓ Provides access to a wide array of doctors with specialization that will meet patient's medical needs
- ✓ Provides a personalized treatment plan with estimated cost by our InHouse Medical Coordinator that is tailored to the patient's requirements
